This Supplement to *Neurology* was produced by Little, Brown and Company, Boston, Massachusetts. Its publication was supported by an educational grant from Rhône-Poulenc Rorer. The Supplement was prepared for publication by The Medicine Group (Education) Ltd., Oxfordshire, UK, from the symposium entitled *Therapeutic Advances in Amyotrophic Lateral Sclerosis*, on June 20, 1995, held in Munich, Germany. The views and opinions expressed in this Supplement are those of the participants and authors and do not necessarily reflect the views of the American Academy of Neurology; Little, Brown and Company; Rhône-Poulenc Rorer; or The Medicine Group (Education) Ltd.

The Editor-in-Chief, with advice from members of the Editorial Board, reviews requests for publication of symposia on topics of interest to readers of *Neurology*. The decision to publish a symposium as a supplement to *Neurology* is based on the topic, the supplement editors, and the contributors. Once a decision is made to publish a symposium as a supplement, it is not peer reviewed by the Editorial Board of *Neurology*. The individual authors are responsible for their own contributions, and the supplement editors are responsible for the overall quality of the supplement.
