by *Robert Gunzburg and Marek Szpalski*, 347 pp., ill., Philadelphia, Lippincott-Raven, 1998

### **Correction**

In the abstract "Community-based study of the significance of epileptiform discharges in nonepileptic patients [1998;50(suppl 4):A224], the first sentence in Methods should read: "We identified all patients who had their first EEG recorded from 1979 to 1984 while residing in the community of Rochester, Minnesota." The first sentence in Results should read: "A total of 1,940 had no prior history of seizure disorders; 38 (1.9%) had epileptiform discharges on their EEGs."
