

Message from the Editors to our ad hoc Reviewers

On February 3, 2003, *Neurology* launched its online submission, peer review, and tracking system. If we continue to receive uploaded manuscripts at the current rate, we will have received over 3,600 in 2003—a 6% increase in new submissions over 2002. We expect to provide more timely reviews, earlier final decisions, and shorter times to publication. Our goals are the rapid dissemination of important clinical information and the rapid publication of authors' work. We rely on our reviewers to choose the best of these papers and we are grateful for their help. The majority of reviewers have become comfortable with our online peer review system. We have appreciated the help and the suggestions from reviewers and authors. Their comments have shaped our new system.

Our online system has facilitated and accelerated reviews from international experts. It has eliminated mail delays, affording international authors the same manuscript turnaround times that domestic authors have enjoyed.

We are especially grateful to those reviewers who review 5, 10, or 20 or more papers a year. These

leaders of neurology and clinical neuroscience have been especially generous with their time. In general, the most senior and busiest people in our field are the fastest, most responsive, most mentoring, and most consistent.

All our reviewers have the Editors' sincere thanks for their efficient, selfless, and responsible work.

Those reviewers with one asterisk have reviewed 5 or more papers. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. Please note that this list includes those reviewers who returned a review or reviews between April 1, 2003, and September 30, 2003.

Robert C. Griggs
