

Message from the Editors to our U.S. and International Reviewers

Neurology will receive over 4000 manuscripts in 2004. Over 90% of papers are peer-reviewed. *Neurology* obtained over 6,000 reviews from April 1, 2004 to September 30, 2004, the six-month period that this acknowledgment includes. Reviewers are normally requested to complete the review in 18 days and our reviewers return them in an average of 13 days—a truly outstanding record. *Neurology* and the Editors owe a tremendous debt to our reviewers. The reviewers' major reward is the knowledge that they have contributed altruistically to clinical science and have worked for the benefit of authors and the readers of *Neurology* and their patients.

We have admiration for and are especially grateful to those reviewers who review 5, 10, or 20 or more papers a year. These leaders of neurology and clinical neuroscience have been consistently generous with their time. In general, the most senior and busiest people in our field are the fastest, most responsive, most mentoring, and most reliable reviewers.

All our reviewers have the Editors' sincere thanks for their efficient, selfless, and responsible work. Those reviewers with one asterisk have reviewed 5 or more papers in the past six months. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. Please note this list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between April 1, 2004 and September 30, 2004.

Robert C. Griggs
