

Message from the Editors to our U.S. and International Reviewers

Neurology received 7% more manuscripts in 2004 than 2003. We have already seen an increase in submissions for the first quarter of 2005 from the same quarter in 2004. More than 90% of papers are peer-reviewed. *Neurology* obtained more than 4,300 reviews from October 1, 2004 to March 31, 2005, the 6-month period that this acknowledgment includes. Reviewers are asked to complete the review in 18 days and our reviewers return them in an average of 13 days—a truly outstanding record. *Neurology* and the Editors owe a tremendous debt to our reviewers. The reviewers' major reward is the knowledge that they have contributed altruistically to clinical science and have worked for the benefit of authors, the readers of *Neurology*, and their patients.

We are especially grateful to those reviewers who review 5, 10, or 20 or more papers a year. These leaders of neurology and clinical neuroscience have been consistently generous with their time. In general, the most senior and busiest people in our field are the most frequent, the fastest, the most responsive, the most mentoring, and the most reliable reviewers.

All our reviewers have the Editors' sincere thanks for their efficient, selfless, and responsible work. Those reviewers with one asterisk have reviewed 5 or more papers. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. Please note this list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between October 1, 2004 and March 31, 2005.

Robert C. Griggs
