

Message from the Editors to our U.S. and International Reviewers

Neurology received over 2,520 manuscripts from January through August 2005. In this same time period in 2004, we received 2,373 manuscripts, a 6% increase. We are on a pace of receiving over 4,100 manuscripts this year. International submissions continue to constitute 65–70% of submissions. More than 90% of papers are peer-reviewed.

Neurology obtained more than 4,780 reviews from April 1, 2005, through September 30, 2005, the 6-month period that this acknowledgment includes. Reviewers are asked to complete the review in 18 days and our reviewers return them in an average of 13 days—a truly outstanding record. More than 25% of our reviews come from outside of the United States.

Neurology and the Editors owe a tremendous debt to our reviewers. The reviewers' major reward is the knowledge that they have contributed altruistically to clinical science and have worked for the benefit of authors, the readers of *Neurology*, and their patients.

We are especially grateful to those reviewers who review 5, 10, or 20 or more papers a year. These leaders of neurology and clinical neuroscience have been consistently generous with their time. In general, the most senior and busiest people in our field

are the most frequent, the fastest, the most responsive, the most mentoring, and the most reliable reviewers.

All our reviewers have the Editors' sincere thanks for their efficient, selfless, and responsible work. Those reviewers with one asterisk have reviewed 5 or more papers. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. Please note this list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between April 1, 2005, and September 30, 2005.

Robert C. Griggs
