in the IDH wild-type group. In the IDH mutated group, the ATRX status allows a prognostic subclassification. These markers plus 1p/19q codeletion argue for a molecularly based definition of all AG, with AOA no longer considered as a separate category.

CORRECTION

A Survey of Cluster Headache (CH) Sufferers Using Vitamin D3 as a CH Preventative (P1.256)

In the abstract "A Survey of Cluster Headache (CH) Sufferers Using Vitamin D3 as a CH Preventative (P1.256)" by Peter Batcheller (Neurology 2014;82:P1.256), there is an error in the disclosures. It should have read: "Mr. Batcheller has nothing to disclose." The AAN staff regrets the error.
