*Associate Editors*

*Neurology*® received 2,457 new and 594 revised manuscripts from October 1, 2013, through March 31, 2014 (compared to 2,205 new and 577 revised manuscripts during this same period in 2012–2013). During this interval, 4,282 peer reviews were received (compared to 4,119 during the same period in 2012–2013). We can only accept a minority of submitted papers due to space limitations, and we must make difficult decisions regarding which articles we believe will most benefit readers and improve patient care. Reviewers' specific comments regarding uniqueness of study populations, novel methods, studies that are especially educational, or new strategies for diagnosing and treating neurologic disease are most helpful and appreciated. In addition, reviewers' constructive feedback for authors of manuscripts submitted to the Resident & Fellow Section of *Neurology*® is immensely helpful to junior authors in improving their clinical and scientific writing abilities. Our gratitude for your dedication to reviewing for *Neurology* cannot be adequately conveyed.

For guidance in reviewing, see the *Information for Reviewers* (IFR) link on the Neurology.org Web site. Click on this link for information on expectations of reviewers regarding confidentiality, timeliness, and reviewer conflicts of interest. The IFR also provides instructions for formatting the comments to editors and authors in order to make communication with authors most effective.

Please send an email message to [journal@neurology.org](mailto:journal@neurology.org) if you would like to do more reviews or if you have never reviewed for the journal but are interested in doing so. Please include a description of your credentials and expertise in the areas in which you are qualified to review.

The reviewers listed below with 1 asterisk have reviewed 5 or more papers. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts. This list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included) between October 1, 2013, and March 31, 2014.
