Neurology® 2018;91:3-11. doi:10.1212/WNL.0000000000005747

Simply listing the names of *Neurology*'s peer reviewers cannot adequately convey our gratitude for your dedication to the journal. Authors benefit greatly by receiving your feedback on their work and peer review continues to be an essential mechanism for assessing quality of research and conferring credibility to the content we publish. We sincerely appreciate all your efforts in reviewing papers.

Submissions to the journal continue to increase steadily. During the 6-month interval from October 1, 2017, to March 31, 2018, *Neurology* received 2,811 new and 635 revised manuscripts (compared to 2,694 new and 581 revised manuscripts during this same period in 2016–2017). We received 3,229 peer reviews (compared to 4,634 during the same period in 2016–2017) for these papers. We can accept only a minority of submitted manuscripts, as we are limited in the number of pages we can publish, and we must often make difficult decisions regarding which articles we believe will most benefit readers and improve patient care. Your specific comments regarding uniqueness of study populations, novel methods, studies that are especially educational, or new strategies for diagnosing and treating neurologic disease make editorial decisions much easier. Feedback for authors on manuscripts submitted to the Resident & Fellow Section is especially useful to junior authors in improving their clinical and scientific writing abilities.

For guidance in reviewing, see the Information for Reviewers (IFR) link on the Neurology.org website. Click on this link for information on expectations of reviewers regarding confidentiality, timeliness, and reviewer conflicts of interest. The IFR also provides instructions for formatting the comments to editors and authors in order to make communication with authors most effective.

Please send an email to journal@neurology.org if you would like to do more reviews or if you have never reviewed for the journal but are interested in doing so. Please include a description of your credentials and expertise in the areas in which you are qualified to review.

The reviewers listed below with one asterisk have reviewed 5 or more papers between October 1, 2017, and March 31, 2018. Two asterisks indicate that the reviewer has reviewed 10 or more manuscripts during this period. This list includes those reviewers who returned a review or reviews of initial submissions (re-reviews of the same manuscript are not included).
