

## Immune checkpoint inhibitor-related myositis and myocarditis in patients with cancer

*Neurology*® 2019;93:280. doi:10.1212/WNL.0000000000007380

In the article “Immune checkpoint inhibitor-related myositis and myocarditis in patients with cancer” by Touat et al.,<sup>1</sup> there were several errors published in the online ahead-of-print version on August 8, 2018. The corrected article was posted online on September 4, 2018.

- The legend for figure 1B should have included “Arrowheads indicate patients with both myocarditis and myositis” and should also have specified “myositis *associated with* immune checkpoint inhibitors” rather than “myositis induced by treatment with immune checkpoint inhibitors.”
- In figure 2G, the scalebar is 20  $\mu\text{m}$ , rather than 50  $\mu\text{m}$ , as originally published ahead-of-print.
- The table 1 legend should have noted “<sup>a</sup>Performance status at the time of ICI initiation” and reordered the following notes accordingly.
- In the Glossary, irMyositis should have been defined as “myositis *associated with* immune checkpoint inhibitors” rather than “myositis induced by immune checkpoint inhibitors,” as originally published. Further, PD-L1 and PD-L2 should have been defined as “programmed cell death 1 ligand 1” and “programmed cell death 1 ligand 2,” and PD-1 should have been defined as “programmed cell death protein 1.” In the ahead-of-print version, these 3 acronyms were incorrectly expanded as “programmed death-ligand 1,” “programmed death-ligand 2,” and “programmed death-1 receptor,” respectively. Lastly, CTLA-4 should have been defined as “cytotoxic T-lymphocyte associated protein 4” rather than “...T lymphocyte-associated antigen 4.”
- In the affiliations list, Dr. Timothée Lenglet was incorrectly listed with Service de Neurologie Raymond Escourolle rather than the Department de Neurophysiologie Clinique at Hôpitaux Universitaires La Pitié Salpêtrière-Charles Foix.
- In the author contributions section, Dr. Pauline Laly should have been listed as assisting with acquisition and interpretation of data, and critical revision of manuscript for intellectual content.
- In the Disclosure section, Dr. Touat’s statement should have read as follows (with changes italicized): “M. Touat is a consultant/advisory board member for Agios Pharmaceutical and Taiho Oncology and reports travel grants from Merck Sharp and Dohme, *outside the submitted work.*”

The publisher regrets these errors.
