

Innovations in Care Delivery

→ From the Editor

Kevin A. Kerber, MD, MS, and Brian C. Callaghan, MD, MS

Innovations in Care Delivery (IICD) highlights articles that feature advances in care delivery in our *Editor's Blog*, *Editor's Top Five Recommended Reading*, and *Latest Articles* sections. Interviews with leaders in the field of health services research are included periodically.

Editor's blog

Recent IICD blogs have discussed issues relating to the COVID-19 pandemic including maintaining patient facing clinical research, stroke assessment during the pandemic, and effective communication in inpatient neurology. Our goal is to highlight health services research articles published in *Neurology*[®] or *Neurology: Clinical Practice*[®] and to give opinions by experts in the field.

Editor's Top Five Recommended Reading and Latest Articles sections

In a commentary in *Neurology*, Yang et al.¹ described how the Stanford Neurology Department rapidly adapted to the COVID-19 pandemic using telemedicine and accelerated an existing quality improvement plan of a tiered roll out of video visits. They discuss issues related to equipment/software, provider engagement, workflow/triage, and training. They conclude that rapid deployment of neurology video visits across all its subspecialties is feasible.

In addition, check out the commentary by Boes et al.² titled "A primer on the in-home teleneurologic examination." The authors propose a practical, in-home, teleneurologic examination that can be completed without the assistance of an on-the-scene medical professional and can be tailored to the clinical question.
